Introduction

Jagsit Foundation is a non-profit, non-governmental, and Non-political Organization established in 2022 by social workers to bring socio-economic change among the poorest of the poor, Literacy, especially among minorities and physically disabled pupils.

Also to bring human dignity & and self-confidence among people through awareness, motivation, education, and training But nature School children are innocent, hard-working, honest, dedicated & sincere to play their roles & responsibilities. But they are paid significantly less than what they are supposed to be rewarded

Thus whether it is out or inside the workplace, in the name of development minorities are cheated. They are exploited everywhere. "Hard work in their nature & blood, but injustice is a part of their life".

The organization's members decide to be devoted to serving the poor & and disadvantaged community irrespective of sex, caste, & and creed and to create a new & and just society by empowering the people to be self-reliant through training, capacity building, skill gradation, and other development activities.

Also to develop leadership qualities to bring social change and to create a classless, oppression-free village based on non-violence and universal brotherhood

Thus the members are dedicated to working for the socio-economic development of the most neglected & and deprived tribal group of Society.

Then the organization was registered under Society Registration Act XXI, 1860 in 2022 bearing registration No-118 under Govt. of Jharkhand

Jagsit Foundation serves all the deprived humanity without distinction of race, caste & or religion. Presently the organization is working in and around the rural area of Godda & Ranchi District in the state of Jharkhand

The Annual General Meeting, held on March 23- 2024, saw full attendance from members. Following a warm welcome, the organization's secretary called up the chairman to initiate the proceedings.

Once the Secretary assumed the chair, the secretary provided a comprehensive overview of the organization's activities up to March 21, 2024. Subsequently, audited accounts, detailing the organization's financial transactions in Rupees, were disseminated among the members.

The organization is steadfast in its commitment to ensuring quality education, fostering sustainable livelihoods, and providing essential facilities for the impoverished. Catalyzing socio-economic development, it actively implements a diverse array of programs encompassing literacy, healthcare, livelihood enhancement, entrepreneurship, and various other initiatives.

During the meeting, the chairman emphasized noteworthy achievements and elucidated the organization's plans. Notable accomplishments included the successful implementation of various programs during the period under review, showcasing the organization's dedication to its mission and objectives.

VISION

Sustainable and dynamic development of suffering and excluded communities in the periphery.

The fundamental values and strong ladder to move towards the above vision are hunger-free, a just society, equitable sharing among the peoples, and ensuring transparent governance.

MISSION

Socio-economic empowerment of tribes, OBCs, and other socially and economically oppressed communities including women, children, and other disadvantaged groups through their capacity building and ensuring provisions meant for them

- To start the process of sustainability leading toward self-reliance using available local resources and identified skills.
- To build up the capacity for the maximum utilization of local skills for its best use to aware people of health, nutrition, and hygiene.
- To start certain need-based income generation programs, especially for the unemployed and vulnerable sectors of society.
- To initiate appropriate and sustainable land and water management practices for the targeted sections of society with the local and traditional perspectives.
- To be aware and empower the community to realize their entitlements, provisions, and other accessibility as per the govt. norms and constitution.
- Jagsit Foundation came into existence through people's demand and dedication to change the scenario of the struggling society. The team Jagsit Foundation is dedicated to the people of the area and its role has been facilitator apart from a sensible watchman.

The working strategy of the organization

The organization used to select the area after visiting the area & and diagnosis of the problem may depend upon the information collected by way of observation questionnaire, discussion with the local leaders, discussion with the main people, etc. Project formulation is done by the expert of the organization & and Participatory Rural Appraisal (PRA) has been adopted for making any decision about the program activities. During the implementation stage, the society used to direct implementation with the help of the community or village committee. Monitoring and evaluation of the progress and impact of the program depend upon the nature of the projects. Our working strategies are based on the following points below here: -

Working with underprivileged and deprived communities' micro-level to understand better critical issues affecting them to address their generic cause.

Collaboring with Government & and various development agencies to recognize & and develop human potential by imparting skills, and development programs for self-reliance.

Influencing change agents like media, academics & and the state through advocacy with the usage of communication tools.

Forming strategic alliances with other players, particularly the voluntary sector, Government, and corporate houses.

 - Developing boldness among prospective beneficiaries,
 - Developing self-confidence among prospective beneficiaries,
 - Preparation of project proposal,
 - Extend support in the establishment of self-ventures,
 - Providing marketing linkage,
 - Monitoring & evaluation,
 - Documentation and reporting

Our Approach

Our primary approach is to poverty alleviation through transformational development which is called the 'area survey program' (ASP). Each ASP focuses on a geographical area and covers Disability, the Underprivileged, and Old age & and it is a long-term involvement of a minimum of 10 years, rooted in the community and partnership with civil society, NGOs, and the Government. We consciously focus on people, groups, and areas in our country that are socio-economically vulnerable. Hence the majority of the ASPs in rural and isolated tribal areas especially focus on the unreached, marginalized, and disadvantaged people.

Major Achievements

- During this year more than 120 families have changed their water-related hygiene behaviors the family members now utilize water pots, and hand wash after defecation.
- Children of schools and AWCs have again been targeted under hygiene practices but results have not been found due to its closure.
- 3 water sources have been renovated for safe drinking water in the operational areas under Godda district. Meanwhile, 12 platforms and others were also repaired in the area for access to the community's safe drinking water.
- Construction of nearly 110 compost Pits to train the villagers in the decomposition method of organic waste material and convert it into usable fertilizer to promote vegetable production in rural areas ensuring health and economic sustainability.
- To conserve the rainwater and mitigate the drought, 2 water harvesting tanks have been renovated through the gram sabha under JF. It is expected to cover, more than 100 acres of land that have been irrigated to protect the paddy crop from drought

Entrepreneurship Development:

We also provided entrepreneurship development programs to individuals who wished to start their own businesses. These programs included training in business management, financial planning, and marketing.

Community Outreach Programs:

We conducted community outreach programs to reach out to more individuals and provide them with information about our vocational training courses. These programs included door-to-door campaigns, awareness drives, and career counseling sessions.

Capacity Building:

We also provided capacity-building programs to our trainers and staff to enhance their skills and expertise in providing vocational training to individuals.

Conclusion:

In conclusion, we are proud of the work performed by our skill development program through vocational training in the past year. We hope to continue our efforts toward providing vocational training and enhancing the employability of people from underprivileged backgrounds.
